### EXPERTS SAY: Japan May Launch Assault On Russia Within 2 Months

By ROBERT P. MARTIN  
Copyright, 1942, by British United Press and  
The Edmonton Bulletin  
CHUNGKING, China, Feb. 26.—Well-informed American, British and Chinese military experts expressed belief today that Japan would attack Russia through Siberia within two months. Russian sources likewise expressed belief that the attack would come but declined to speculate on its date.

In some quarters it was suggested that the belief that Japan would attack Russia, as expressed in a survey of expert opinion, was the result of wishful thinking.

### EXCLUSIVE

Most of the experts, however, based their opinion on the belief that it was imperative for Japan to protect its flank and remove the danger of a Russian attack or of an arrangement by which United States planes might be based in Siberia.

The experts said they believed Japan would attack Russia as soon as the invasion of the Netherlands East Indies had taken a decided turn in its favor and that the attack would be made before any attempt to conquer India or Australia.

In speculating on a Japanese attack on Russia, the experts said they believed Japan and Germany had agreed that the best means of knocking out Russia was by a two-front war and that later they hoped to devote their attention exclusively to the United States and Great Britain.

They said also that an invasion of Australia was not of vital immediate importance to Japan, because it had occupied Timor and occupation of New Guinea would make Darwin, in northern Australia, untenable as a major naval base without control of the air.

### BOARD OF 15 RECOMMENDED Full University Control By Governors Is Proposed

### U.S. Subs Torpedo 4 Jap Ships

By The Canadian Press  
A American submarine smashing at Japan's sea-borne invasion army was officially reported today to have torpedoed four Japanese transports, an auxiliary ship and a freighter. A bulletin from the United States headquarters announced the attacks occurred within the past 48 hours.

In addition, a Japanese warship, one of a squadron, was listed as "presumed" hit. The attacks were the effect of Japanese forces being forced to divert before they could be used in the Philippines.

In the battle of Burma, a Reuters dispatch said fresh Chinese troops were streaming southward into the beleaguered country, ready to combat the Japanese thrust northward toward Mandalay, 275 miles above Rangoon.

### CHINESE IN ACTION

London military quarters said Chinese had already advanced to the Japanese line in the "patrol actions" in the northern Szechuan province of China.

While British and Indian troops fought with their backs to the wall in the Szechuan province, Chinese demolition squads started destroying vital installations. They were reported to have captured the capital, and only charged ruins remained of the site of a big oil refinery.

### Adjournment Is Granted On Murder Count

A further adjournment to March 1 was granted today by the court in the case of the late Senator Claude Pepper of Florida, who was charged with the murder of a neighbor, Theodore DeWitt, on August 1, 1935, when he was brought from Fort Belknap, Alaska, to the federal penitentiary at Leavenworth, Kansas.

The 65-year-old farmer, who is alleged to have shot and clubbed DeWitt to death, then buried his body in a field on his farm, made no statement. He is represented by counsel and, according to police, has not yet requested representation.

### Heavy Fighting In Serbia Reported

JMRS. LONDON, Feb. 26.—(AP)—New heavy encounters between Serbian Chetniks and the Axis-allied Croatian Ustasha north of Belgrade were reported here by the Associated Press.

### ADMIRALTY REVIEW GIVEN Big Nazi Cruiser Is Hit By Torpedo Near Norway

Moreover, he said, the submarine Trident sent a torpedo into the bow of the Prinz Eugen class, probably into the Prinz Eugen. The Trident also may have hit the German destroyer, it was indicated in a simultaneous communication from the Admiralty.

The ocean-going Trident, 1,000 tons at the surface, has been designated Germanic. Norwegian sailors said it was carrying the navy's first Lord of the Admiralty, A. V. Alexander.

### Russ Ring Closes On Nazi Army

MOSCOW, Feb. 26.—(AP)—The Russians declared today they had defeated reserves which the Germans were hurrying into the flaming battle of the Staraya Russa area, where a Soviet ring of destruction closed tighter around the German army.

## REPORT IS TABLED IN LEGISLATURE

# Full Control Of University By Governors Is Proposed

## Committee Recommends Two-Man Increase For Administering Board

board of governors consist of the chancellor of the university, president of the university, president and vice-president of the Alumni association and one other representative of the alumni, deputy provincial treasurer and deputy minister of education, and a chairman and seven other persons appointed by the lieutenant-governor.

## Reports

ness of the university and to report and make recommendations on them to the board of governors and to the appropriate faculty councils of the institution. These powers and duties would be similar to those assigned to the survey committee.

The committee recommends that the chancellor be elected a provision in the present act, with the term of office to be 10 years.

## Tables Document

in comparison with those charged at other Canadian institutions.

The 10-year building expansion program, estimated to cost \$100,000, is outlined in the report.

While such a program may seem impetuous, even when compared 10 years, "it must be remembered that practically no construction has taken place on the campus since 20

## Press Acclaims Call Of Cripps For Total War

**Continued from Page One**

Nally, deputy minister of education; Dr. H. C. Newland, professor of comparative education at the University of Toronto; and J. W. Barrett, secretary of Alberta Teachers' Association.

In terms of reference were whether the University can or cannot adequately meet the educational requirements of the people of the province; whether the University is doing its duty in the educational system of the province; whether the University is contributing effectively in the development of industrial

school, be re-examined," says the report.

The point did the survey committee receive more submission than on the importance of intensifying research in the field of extension throughout the province.

The report also indicates the fear of substantial expansion but thinks part of this might well take the form of increasing contacts of the staff of other departments with the university, says the report.

The committee feels "that the number of students could reasonably be increased by one-third and that the staff should be increased by one-fifth."

Council, no appointed member has been named as yet, more than six years. Of the first man appointed, two should have been named after three years, and three for six years, say the members. The council shall hold office for six years.

**THE SENATE**

The 26 members of the senate will follow the same pattern as the chancellor and the president of the university. The senate will elect a governor, supervisor of school principal of St. Stephen's College, and a vice-chancellor. The principal of Mount Royal Junior college will be ex-officio member of the provincial institute.

Public hearings were held in this city on June 12 and 13. Briefs there received from 20 organizations and individuals.

There were 17 submissions from various bodies and officers of the University and others from faculties and schools.

**WILL PROBE FURTHER**

"Recent problems and the possibility of more effective functioning by the university in the development of the agricultural and industrial resources of the province are being probed further," said the technology and art director of the department of extension; president of the association; one elected representative of the Alumni Association; three representatives of the general faculty council; one representative of the students' union; and one student of the students' union. "At least 18 persons would be styled 'statutory members'."

The committee submitted an interim report as it is proposed to make further investigation.

The interim report consists of 139 pages of text, 10 pages of material, double-spaced and several appendices. It was submitted to the Lieutenant-governor-in-council on January 30.

The committee made the following observations in the report:

The report says the committee believes that the Council of Alberta can serve a most useful purpose as the research arm of the provincial government.

"An agency which ties in the research capacity of the university to provincial needs as seen by the government."

The committee also suggests that the Council should be made up of seven additional members (three from the business community and four from the professions and provincial government).

**SEVEN MEMBERS**

The seven appointed members to be selected to represent agriculture, business, labor, industry, the professions and provincial government.

colleges of education be given faculty status from now on. "Since the colleges of education has never been large enough to keep the high school curriculum supplied, it seems wise, on the one hand, not to make the course unduly long, and on the other hand, to provide intermediate stopping places for students who cannot take the whole course at once, says the report.

### PROPOSED EXTENSION

One section of the report deals with the proposed extension of the period of studying the university. It recommends that "further study should be made of the feasibility of extending the period of studying by increasing to the maximum the part of the year in which it is in full operation."

[illegible]

**NEXT QUARTER**

"Students may enter at the beginning of any quarter and withdraw at any time. Students are notified. Those who must take a leave of absence are notified. Those continuing may drop out for any number of quarters required to meet the minimum requirements. Those in financial position to do so may continue continuously throughout the

ter to be given statutory authority. The result would be that the matters would be dealt with by a body familiar with the matter with the minimum delay. It is pointed that this is in harmony with the methods and principles of the present system. The proposed changes would be handled in the same manner as the

**POWERS IN BOARD**

At present, except as otherwise

3 That as a general principle to be applied, for example, to Normal Schools, the Board shall have the power given for work that is relevant to the program of the degree toward which the student is working.

6 That the College of Education shall have the power to make such provision for accommodating the different groups of students in the College of Education as may be necessary for training teachers in

Such a system would seem particularly applicable to the implementation of the rehabilitation program. It would allow rehabilitation personnel to be assigned continuously to the same case, rather than to move from one case to another if the case emergency becomes more acute. It would also allow the rehabilitation personnel to be assigned to the same case, rather than to move from one case to another if the case emergency becomes more acute. It would also allow the rehabilitation personnel to be assigned to the same case, rather than to move from one case to another if the case emergency becomes more acute.

inspire students with loyalty and a sense of responsibility to their university, so that they may go out into the world as crusaders for their Alma Mater.

The committee believes that the students should have direct representation on the senate, and that the proposed revisions of the University Charter and academic regulations for the alumni also are recommended, includenlarged representation of the alumni on the senate.

**IMPORTANT FUNCTION:**

The committee believes that an important function of the senate is to be a bridge or link between the faculty and administration on the one hand and those of the university, for that reason, its members should include representatives from both groups.

**ALUMNI TO STRUCTURE**

11. That the alumni should be built more closely into the structure of the university.

[illegible]

to make a detailed study of the progress of the average student. The report says that the necessary material, adequate and clearly understandable, is available to the student. It is subject to the committee's decision to explore more fully the central preliminary work of the student. The staff of the university is to be kept informed of the progress of the student's work. The staff of the university is to be kept informed of the progress of the student's work. The staff of the university is to be kept informed of the progress of the student's work.

the approval of the Canadian Nurses Association. Registered Nurses represented on the senate. Your grant will be used to fund the stipends that may be made to the university by professional societies. We recommend that the professional societies be asked to agree to be served and the interests of the university be protected. If representatives of the professional societies are not on the board, they are not their appropriate faculty councils.

Your committee is strongly of the opinion that the following provisions for travel be increased.

scheme without new building developments. When these can be provided, and the present school of nursing is adequately housed, the committee recommends that the proposal for a central preliminary

era and duties as provided in the present act, but that such chancellor should not hold office for more than four consecutive years.

The committee recommends in regard to the office of president, that in order that he should have the time properly to discharge his duties, there should be a business manager or comptroller appointed, who would directly represent the president in the business affairs of

**H. H. Farlee, K.C.**, who is chairman of the special committee appointed to investigate the operations of the administration and future requirements of the University of Alberta, is seen here with **Hon. Solon E. Low**, provincial treasurer, who is the report on the investigation into the University of Alberta, in the absence of the president.

by the members of the senate in its entirety from time to time but so that the total number of statutory members of the senate shall not at any time be greater than 25. The registers of the university shall be the records of the senate.

No appointed member of the senate should hold office for a longer

**POWERS OF SENATE**  
The power of the senate should, in general, be as of a continuing body to enter into any measure might tend to enhance the usefulness of the senate.

**Recommendations “Changes”**

every normal school and the provisions of the act shall be construed to the effect that a business manager or superintendent of a normal school shall be appointed by the board of governors from among the persons who are qualified to hold the title of vice-president, be appointed to the position of business manager or superintendent of the normal school, and shall be responsible for the business affairs of the institution.

**EXCLUSIVE POWER**

17 That the university should have the exclusive power to appoint and remove the business manager or superintendent of the university, and to exercise the powers within the province.

18 That the commercial use of the name of the university or any derivative such as "Varsity" without the consent of the university be prohibited.

19 That a minority report on the constitution of the university be adopted and the method of appointing the

23. That the department of political economy be strengthened to include research and extension studies in farm management and farm economics;

**STRENGTHEN DEPARTMENT OF POLITICAL ECONOMY**

24. That the department of political economy be strengthened to include research and extension studies in farm management and farm economics;

25. That the university administration find an appropriate way to fund the university to the extent that it is necessary to

25. That the Research Council of Alberta be revived as the research arm of the University of Alberta, as an instrument of great potential usefulness in the development of the University of Alberta;
26. That the first step in the rehabilitation of the foregoing council be the immediate publication of its report;
27. That the practicality of natural science be emphasized in the student body respecting the importance of the natural sciences in the University of Alberta, and that the following be recommended as the minimum program, and other services which concern the students financially:
  46. That the board should ensure to junior members of the teaching staff the opportunity to be heard forward for consideration by faculty councils their ideas concerning the work and policies of the university;

products as a means of raising the standards of living of the people and utilization of these products be accelerated.

42. That the production of more adequate accommodation and other facilities for instruction and recreation for the people be placed well up on the list of executive priorities.

43. That the present improved set-up for chemical engineering be maintained.

44. That there should be a long-term policy of expansion that should be steady, to avoid the disruption of the economy from sudden change; and that new responsibilities should not be accepted until the country's finance has been fully explored.

45. That a planned and co-ordinated expansion policy be implemented to prevent the efficiency of the physical plant becoming seriously impaired.

46. That the appointment of the president or board members be made on the basis of a careful consideration than the welfare of the country.

47. That the minority report said in connection with the above, I think rightly, to say that there was no evidence presented to the committee to believe that the Government has in the past been exerted on the basis of the welfare of the country.

48. That the appointment of the president or board members be made on the basis of a careful consideration than the welfare of the country.

adequate department of chemical engineering, with petroleum engineering as a branch.

30. That the board of governors should be the controlling body in the university.

**INCREASE MEMBERS**

31. That alumni representation on the board should be increased to five members, and that the department of education and the deputy provincial secretary should be invited to nominate.

32. That a building program be undertaken to provide more space for the departments in urgent need of it.

33. That consultation in the provincial laboratory of the board be as serious as to demand immediate action.

34. That to protect the morale of the staff from further deterioration and to encourage the growth of young men, the salary schedule be revised.

**multifunctional**

35. That the report says that the president is appointed directly by the lieutenant-governor-in-council, and that the president is the university's member of both the senate and the board of governors. He carries great responsibility for harmonizing the whole university.

Dealing with university finance

active of the various elements of provincial society, including students (item 34), that it should have the important function of creating a bridge between the university and the life and activities of the province; that it should include such of its present powers and duties as relate to matters with which its members may be expected to be familiar.

35. That the general faculty council should be such as to show separately the estimate of the services not chargeable to intra-mural students.

36. That steps be taken to encourage increased attendance of students on the bridge between the university and life (especially in the faculty of agriculture) and to extend the benefits of university education to young people.

37. That the usefulness of a liberalizing curriculum, to maintain freedom to students in electing subjects.

31. Take over most of the purely academic functions presently discharged by the senate, including the recommendation to convocation of the granting of degrees in course.

32. That the other faculty councils continue to discharge such academic functions as are appropriate to them.

33. That the deans' council be given statutory authority as an advisory and executive body.

34. That the term of office of the deans be extended to four years.

35. That classes with very small registration be kept under careful scrutiny to ensure that they not become a source of unnecessary expense.

36. That before establishing new courses, great care should be extended to ensure that the need for them is clear.

37. That in making appointments of new faculty, the faculty should raise a fresh body of "C" intensely its clean, excellent plus. And quality: the excellent.

39. That the president of the students' union be a statutory member of the senate.

**CAPITAL COST**  
Proposed for 1944-45 is an estimated total cost of \$100,000 and a similar sum for the next year, for completing the east wing of the medical building, to house the provincial laboratory, dental clinic, school of nursing and school of pharmacy.

In following years, there would be such projects as completing the center wing of the medical building, new wing for the department of biological science building, new building for department of chemical engineering, nurses' home at University Hospital.

The report says that to expand the work of the department of extension by one-third involves increasing its annual appropriation.

The proposed faculty of education, it is suggested that its annual appropriation be increased by \$2,500, while it remains in its present cramped quarters. The building is expected to be completed in 1932 after it is established in the Normal school building.

**Teachers' Strike**  
**At Monroe Law Ends**

**AT MOOSE JAW LIES**

MOOSE JAW, Sask. Feb. 26.—(CP)—G. D. Eamer, secretary of the Saskatchewan Teachers' Federation, and James Smith, chairman of the Moose Jaw school board, announced Wednesday night 125 Moose Jaw teachers will resume work on Monday, ending a 10-day strike.

Terms of the settlement, reached at a meeting of Mr. Eamer, teacher

which we have all been waiting for," and the Skelton said: "Here is a new voice, a stimulating voice."

**GASOLINE WAVE**

Some observers believed that St. Louis's settlement might have been the start of a gasoline wave out of the city. The next day several papers called attention to the fact that the 750 automobiles had been taken

Four thousand public and high school pupils were given a forced holiday beginning Feb. 16 when teachers carried out their resolution to strike if an increase of 13 per cent in their wages was made by that time. The teachers demanded the wage scale be increased 13 per cent, bringing it up to 88 per cent of the basic rate paid in 1929.

## Jap U-Boats May Carry Airplane

LONDON, Feb. 26.—(CP)—The Japanese are believed to be using at least one plane-carrying submarine and possibly more, informed sources declared Wednesday.

They said that when the New

Zeland armed merchant cruiser Monowai was engaged by an enemy submarine near New Zealand waters about 100 miles ago she was attacked simultaneously by a plane believed to have come from a submarine. Neither attack caused any damage.

A submarine armed aircraft probably would be a seaplane which could be stored in two sections in hangars on each side of the

# Alberta District News in Brief

## Delburne Lodge Initiates More Than 50 Members In Elks' Order

DELBURNE—Packed to the doors, the Delburne community hall presented a colorful scene Monday night when more than 50 applicants presented themselves for initiation to swell the membership of the lodge here to more than 100.

Ceremonies were in charge of P. A. Miquelon, of Edmonton, official representative of the Grand Lodge of Canada. He spent the last two weeks in Delburne recruiting this class of candidates.

Officers of the Trochu lodge and its patrol team assisted in the ceremonies of initiation. J. P. Ferguson of Trochu, Grand Leading Knight, expressed his delight at the wonderful headway made by the lodge during the short period of the selective campaign under the personal direction of Mr. Miquelon, who was complimented on his efficient work.

Mr. Miquelon congratulated the local lodge on its accomplishments of the past and in a brief review of the history of the Order, quoted statistical facts in proof that the "Elks" were making rapid strides in Canada. Both the Grand Lodge and its subordinate lodges throughout the Dominion have become real potent factors in generous contributions to the war effort.

Mr. Miquelon said figures would show that in 1939 the Dominion convention had in fact in Fort William, Ont., this year, had increased its membership since September 1939 by a larger number than it had in any previous similar period in its history since pre-depression days.

A lunch was served after the conclusion of the evening.

**AUTOMOBILE PLATES**  
Forty-three states and the District of Columbia require two plates on every automobile, while in five states it is necessary to have only one plate.

## At Ceremony

P. A. Miquelon, Edmonton, official representative of the Elks' Grand Lodge in Canada, who officiated at the Delburne Elks' Lodge this week.

## Pigeons Hatch Young Despite Cold Weather

**FAIRVIEW**—Although it is quite cold, there are tangible signs of spring in Fairview. In the backyard of Russell Levers' barn, two pairs of pigeons have hatched out three squabs. The nestlings are still featherless. The period of incubation was 18 days, but it will be sometime before the nestlings are fledglings and able to take flight.

## With The Men In Uniform

**SEKEMITH**—A send-off party was given this week for Norman Umshoff, who is the 40th man to join the army from this village.

**JASPER**—Young people entertained at the home of Mrs. J. S. Robson last week in honor of Sgt. WAG and Mrs. R. F. Gourley. Following supper gifts were presented to the bride and groom.

**SYLVAN LAKE**—Sgt. Dave McCutcheon after several months in the physical training branch of the R.C.A.F. at Edmonton has been transferred to a station in Eastern Canada. He visited his home on Sunday.

**RAWL**—A farewell party was held at the home of Mr. and Mrs. Chris Lemke last week for their son, Parker Lemke, who is leaving soon to train at the Canmore Military Training Centre. A watch was presented by Mrs. Lester Harrison on behalf of his friends.

**KILLAM**—P. W. R. Holt of Dry Couling has been appointed temporary secretary of Killam School District No. 22. The present secretary, H. Roberts, leaves March 11 to join the active service.

## Special Services At Sylvan Lake

SYLVAN LAKE—Sunday was a memorable day at Memorial Presbyterian Church. The day started with the Sunday School session at 11 a.m. This service two presentations to honored members were made—Miss Lily Cameron, organist, was presented with a Presbyterian Hymnal; a former superintendent, J. W. McIntosh, hon. leave from the R.C.A.F. at Lethbridge, was presented with a fountain pen. Miss Cameron will become organist of Knox Church, Red Deer. The presentations were made by Mrs. A. M. Steele.

The evening service was appointed to succeed Miss Steele as organist. In the afternoon a special victory loan service was held, addresses being made by Rev. John Hart, B.D., and Mayor Percy Duffield. Young Murray Keith and Carl Groby were ushers.

The evening service was attended by the Girl Guide under the supervision of Miss Jessie Cameron. The Guide was commemorating the birthday of General Baden-Powell. Mrs. E. J. Walker was soloist.

## Loan Drive At Alberta Points

**TROCHU**—At the end of the first eight days of the Trochu unit of the Second Victory Loan campaign has contributed \$13,000 in war bonds.

**FAIRVIEW**—Municipal District of Fairview No. 838 bought \$2,000 worth of Victory Bonds this week through E. J. Martin, secretary-treasurer. The 1941 purchase was \$20,000 of the \$22,000 quota.

**SYLVAN LAKE**—Representers of Golden West Municipality advised the Council to invest \$1,000 in the bonds of the Victory Loan. The Sylvan Lake title is now about \$20,000 of the \$22,000 quota.

**STROME**—Strome Victory Loan committee announces that the Strome district is 12% over its quota of \$9,000 and is still going strong.

## SIDE GLANCES

"I'll take this one for Dad's birthday present—it'll look swell on me!"

## Rocky Mountain House Is Mecca

Boys Marvel At Way Things Are Done

## For Visiting Overseas Airmen

**ROCKY MOUNTAIN HOUSE**—For a town far from any training center, it has vista from more Old Country airmen, training at Fairhead than any other Alberta town.

Citizens have opened their homes, the boys are welcome to come any time, day or night, when they have leave. It is really unkind of the weather to be so mild, for these Old Country boys cannot believe that we often have fifty below, and have been known to shiver at sixty below.

**STRANGE FOODS**  
They eat strange foods and popularly insist that they like them, marveling at the abundance of everything. But only a few try coffee, they plainly prefer tea, hot strong tea. They do the dishes, run errands for the house, and take in everything in town. Almost every boy has bought skates, and they are learning to ski.

There are three buffets on Mr. Steiner's farm on the edge of town and they want pictures of them. One or two venture some pilots have walked up to the buffets and had their pictures taken with the animals.

They especially like the way everyone speaks to them. We westerners, of course, speak to almost everyone we meet and secondly, we certainly speak to the men in uniform. Another thing they aren't used to is the unbroken doors of the west.

These boys represent a cross section of the countries fighting for freedom. They met in England, and were sent out here to finish their training. One nation, boy has had more flying experience than the average. He learned a little about it in his native country and was in the north when war was declared. He didn't return home, knowing the chances of his country being overrun, but he hurried to England to offer his services for the cause of freedom.

For a while he ferried planes from Gibraltar to Africa, Asia and England. There came a time for bomber fighting. Another boy from Jamaica is shivering in what we think has been a tropical winter.

**AMEMBASSADOR SON**  
There are boys from South American countries. The son of the Brazilian ambassador to England was among the first who came here for holidays.

Many declare that once the war is won, they are coming back to make their homes in Canada, where they have found friends, and promise to come back to them.

They enjoy week-ending here so much that three air force boys walked half of the way in last week. Missing the train and bus, a friend drove them half way and then they walked and walked to the house, and finally went into a farmhouse where the kindly lady insisted they stay all night and sleep in the room.

## Gleaned From Rural News

**SEKEMITH**—The annual winter carnival was a success, the feature this year being the exhibition by the Aurora Skating Club of Puget River. The school meeting decided to put in electric lights in the school.

**SYLVAN LAKE**—Mr. and Mrs. J. Boyle of Toronto were visiting at the home of Mr. and Mrs. W. J. Gray. Mr. Boyle is a nephew of Mr. Gray.

**KILLAM**—Mr. and Mrs. Howard Howard and two children, of Edmonton visited here recently at the home of their parents.

**RAWL**—The Women's War Committee of the first district met at the home of Mrs. C. R. Sargent recently with Mrs. J. W. Howie, president.

**FAIRVIEW**—The community hall members are named. The annual meeting of the Fairview community hall members was held on Monday evening, Feb. 23, at 8 p.m. W. G. Boyd was elected by acclamation to the hospital board representing Division 3 and 6.

**COUNCILLOR, BOARD MEMBERS ARE NAMED**  
The annual meeting of the Fairview community hall members was held on Monday evening, Feb. 23, at 8 p.m. W. G. Boyd was elected by acclamation to the hospital board representing Division 3 and 6.

**McCOY HEALTH SERVICE**  
The formation of gallstones is somewhat of a mystery, but is evidently connected with a stagnation of bile. An over-consumption of starches and sugars in the diet, and sedentary occupations and disturbances of metabolism may contribute to the forming of stones.

The diagnosis of gallstones is best made with the X-ray, the patient having been given a dye which will make the gall bladder show up. X-rays are found this way with considerable accuracy, and can be very plainly on the X-ray picture. Stones containing calcium are the ones most easily detected.

The larger type of stone may require surgical removal, as it is impossible to expect it to be passed out of the gall bladder of its own accord. For the smaller type of stone, the best plan is to rely upon the advice of a good surgeon, who will decide whether immediate operation promises successful results, or whether it is advisable to delay.

The small stones may often pass upon a remedy. Many surgeons recommend a period of "watchful waiting" when the patient is getting along reasonably well and when the stones are quite small. In my own experience I have found that in the case of the small stones the patient may often be helped by going on a short fast, and using the olive oil and grapefruit juice emulsion. The emulsion will stimulate the flow of bile and will bring about a situation favorable to the passage of the small type of stone. During the 5-day fast, I enema daily is required.

Hot applications over the upper right hand side will often help to reduce nervousness or tenderness.

The fast may produce the desired escape of the stone or stones. The acids of the bile in the gall bladder often seem to stimulate a better flow of bile and the improved bile drainage will help to wash out the smaller stones. When the stones do not escape the patient should go on a very careful diet, omitting foods having much fat or oil and also omitting sugar and starch in any quantity. Constipation must be avoided. These measures may provide the patient with long periods when he is comparatively free from symptoms.

If, after a most careful fasting and dieting regimen, the stones still remain in the gall bladder, then it is still plenty of time to consider an operation if it seems necessary. Infection, indigestion or a stone in the common duct, producing persistent jaundice, and similar ailments may force a crisis requiring surgery, but it is also true that in many cases the best plan is to leave the stones in the gall bladder, giving the patient relief through a good dietary management of his case, avoidance of constipation, and the use of heat over the gall bladder.

All questions regarding Diet and Diet will be answered. Large, stapled, self-addressed envelopes must be enclosed. Write on one side of paper only. Letters must not exceed 100 words. Address: McCoy Health Service, 1151 West 6th St., Los Angeles, Calif.

# BRIDE CAME FORTH

By Louise Holmes

WICKY GAYLORD is being painted in her wedding gown by artist LARRY LATHAM in a department store where he used to be before she was a model. She is a blonde, and her hair is styled in a modern fashion. She is wearing a white dress with a high collar and long sleeves. She is looking down at her hands, which are clasped in front of her. She is standing in a room with a large window in the background. The window is looking out onto a city street. There are cars and buildings visible outside. The room is brightly lit. The artist is standing next to her, looking at her. He is wearing a dark suit and a white shirt. He is holding a paintbrush in his right hand. He is looking at her with a focused expression. She is looking down at her hands, which are clasped in front of her. She is standing in a room with a large window in the background. The window is looking out onto a city street. There are cars and buildings visible outside. The room is brightly lit. The artist is standing next to her, looking at her. He is wearing a dark suit and a white shirt. He is holding a paintbrush in his right hand. He is looking at her with a focused expression.

TO UNEXPECTED WEEKS followed. It was well that the bride had these two quiet weeks in which to get her bearings, in order to formulate a simple program. She thought of the program as a well defined pattern, which was to be followed to the letter. Little did she know that, after a brief respite, the well defined pattern was to be jumbled beyond recognition. She found an apartment on E. Thirty-ninth at a clean room furnished with a couch that became a bed by night, a few comfortable chairs, a table, a sink, cupboard and a gas plate behind a screen. She took an insurance policy that covered illness and accident and hospitalization. She budgeted her scanty income to include a small weekly saving. Firmly she stood on her own two feet. Her job at the studio earned her to be a hectic proposition, some days long hours, occasionally later into the night. During the first week she tried out on different programs, perhaps only a line or two, often on the spur of the moment with scarcely time in which to go over the script. The second week she was directed to write a spot. Her charming voice spoke convincingly of both past and present events and people. Before the second week had come

## Japanese Admiral Killed Off Borneo

TOKYO, (From Japanese broadcast) Feb. 26 — (AP) — The navy ministry announced today that Rear Admiral Shikui Shibuya had been killed in action Feb. 14 off Borneo.

## Gaiety Shown At Grim Time Helps In War

Grimness and gaiety have seen the allied peoples through several trying moments and will see them through to victory, Frank Boswell, advertising counsel to Galt, Perks and Barber, Limited, who is touring the west to help stimulate Canada's all-out war effort, told the Rotary Club at the regular luncheon at the Macdonald hotel, Thursday.

Mr. Boswell, speaking on "With Grim Gaiety," cited numerous experiences of people of Britain and of conquered European nations who have defied defeat only by demonstrations of gaiety during the grimest moments.

He quoted the words of a famous scientist to bring out the essence of his address. The words are: "More real achievement can be accounted for with 98 per cent of perspiration and two per cent of inspiration."

### INSPIRATION SAVES DAY

It is the two per cent inspiration that is so essential in the war effort, he said. On numerous occasions the 98 per cent perspiration was at the breaking point, the two per cent inspiration saved the day, he explained.

That was the case hundreds of times at Dunkirk. People of the conquered nations of Europe are showing that same spirit. The Battle of Britain was stemmed against tremendous odds, only for that spirit of gaiety during the grimest moments, he stated.

This has been shown in Norway, Poland, at Tobruk and on every battlefield. He cited actual experiences of soldiers and civilians who turned defeat into victory against tremendous odds.

## Pacific Charter Not Yet Mooted Attlee Asserts

LONDON, Feb. 26 (AP)—The British government has not approached Washington on a proposal for a declaration of peace aims to be known as the Pacific Charter, Clement Attlee, Dominion secretary, said today in the House of Commons.

He declined to say whether Britain would use the initiative in "testing some such declaration covering the Pacific."

## Funny Business

"A spear goes with each suit, so you can pick up things without stooping!"

## Enemy Agents May Have Operated Planes Over L. A.

WASHINGTON, Feb. 26.—(AP)—War Secretary Simon said today that unidentified airplanes, possibly as many as 15, which may have been operated by enemy agents, were over Los Angeles early yesterday and were fired on by United States army anti-aircraft guns.

Simon said the incident occurred late yesterday by Secretary of the Navy Knox as a "false alarm," occurred between 3:12 and 4:15 a.m., Pacific war time.

Anti-aircraft guns of the 37th coast artillery brigade fired 1,430 rounds of ammunition at the planes, which Simon told a press conference were officially reported as flying at speeds ranging from "very slow" to 200 miles an hour, and heights of 10,000 to 18,000 feet.

The planes dropped no bombs. Simon said there were no casualties among American troops, none of the planes was shot down, and no American army or navy planes were in action.

**ARMY CHIEF'S REPORT**  
Since no bombs were dropped, Simon said, it was possible that the planes might have come from commercial sources operated by enemy agents to spread alarm, disclose the location of anti-aircraft gun emplacements, and slow down war operations by causing blackouts.

The secretary said his information was contained in a report from Gen. George C. Marshall, army chief of staff, and apparently was based on reports to Marshall from army officials in California.

## Two Alarms Keep Firemen Active

A fire alarm at 5:23 p.m. Wednesday sent firemen hurrying to a Mackenzie Air Services aircraft repair depot at Calder, where a small blaze had started in some old straw stacks adjacent to the building. The flames, however, were quenched before they had an opportunity to spread to the building and

## Three Firms Are Fined On Wage Charge

Fines and costs totalling \$115.79 were levied against three Edmonton firms by Magistrate M. M. Downey for evasions of the provincial Minimum Wage Act, and in addition the court ordered that \$23.44, the difference between wages paid and the minimum wage scale, be paid to six employees forthwith, with jail terms of two and three months as the alternative.

The Western Tannery Co. was found guilty of two evasions of the act and was fined \$25 on each count, and ordered to pay the back wages or, in default, to serve three months in jail. Frank Barnes, manager of the tannery, was charged with the offences. Back pay must be paid within 10 days.

### ORDERED TO PAY

S. Romanuk and A. Chapman, proprietors of the C. N. Service station, were fined \$10 for failure to pay the minimum wage, and were ordered to pay an employee \$12.24 back wages.

Proprietors of the New London Cafe, William Knick and Miss Szyk, were fined \$25 and ordered to pay \$52.77 back wages to four employees. Failure to pay will result in a two-month jail sentence.

K. A. Pugh, acting chief inspector of the Board of Industrial Relations, prosecuted.

### Driver "Does" Pays Fine After Accident Occurs

A quick "nap" while driving his car on Western, between 85th and 90th avenues, and out in city police court Thursday, and could, police pointed out, very easily have claimed his life.

Baleman was charged with dangerous driving as the result of an accident on Feb. 14, when he crashed his car into the guard rail of the bridge on Saskatchewan Drive, between 106 and 107 streets. Approximate 30 feet of the bridge was damaged and the police stated that it was only a miracle that the auto didn't plunge 60 feet to the ground below.

In explaining the accident, Baleman told Magistrate Miller that "he must have dozed off."

No damage resulted. Firefighters responded to a second alarm at 7 p.m. when a chicken house at 10300 19th street caught fire.

Apartment from Suite Nos. 2 and 3 extinguished the flames and damage was not heavy. Fire Chief James Meagher declared that an over-heated stove caused the outbreak.

## Major A. West Presented With Militia Medal

Recognition of "long efficient service" in the Canadian militia was given to Major A. West, paymaster of the University of Alberta contingent of the Canadian Officers' Training Corps, by Maj. Gen. W. A. Griesbach, C.B., C.M.G., D.S.O., V.D., K.C., inspector-general of western forces, Canadian army (active), Wednesday afternoon at the University drill hall before the regular C.O.T.C. parade.

Major West was presented with the 20 years' long service medal by Maj. Gen. Griesbach.

Maj. Gen. Griesbach praised Major West for his "commendable work in the unit" and congratulated him on the fine record of service which he has given.

A guard of honor was mounted for the presentation. Lieut. Col. P. S. Warren, officer commanding the unit, was in charge of arrangements, assisted by other headquarters officers.

Lieut. Col. E. Brown, M.M., E.D., area commander, was also present.

Major West is a member of the University.

### Ottawa Officer Inspects Motor

Much promising material for the important work of operating the new radio location apparatus now part of defense against aerial attack was inspected here Tuesday by Commander E. T. C. Orde, R.C.N.V.R., Ottawa.

Commander Orde, accompanied by Lieut. Colin Glasgow, officer commanding Edmonton division of the R.C.N.V.R., conferred with University of Alberta professors concerning types of students suitable for this highly specialized line of service.

Later the naval officers talked to several students, who had made application for enlistment.

Men who have the qualifications will later qualify as officers in either the R.C.N.V.R. or the Royal Navy.

### ROAD REPORT

# BUY VICTORY BONDS

## Canada's Largest Distillers Serve the United Nations

IN TIMES OF PEACE, few of us realize that we daily use and cherish countless things, the fabrication of which depends upon alcohol. In times of war, many of us are likewise unaware that alcohol is an indispensable ingredient in the production of everything from munitions to medicine, plastics to fabrikoid... helping to make the powder and shells, guns, tanks, planes, destroyers and battleships needed by our armed forces.

Owning, in the United States, the largest distillery in the world, as well as the most modern one in Great Britain, and being the foremost distillers

in Canada, Hiram Walker-Gooderham & Worts, Limited, are privileged to be able to devote their energy and their century-old experience in the service of the UNITED NATIONS, by contributing to the supplies of the "WAR ALCOHOL" so necessary and vital in the manufacture of munitions and war implements.

Hiram Walker-Gooderham & Worts' vast plants in Canada and the United States, geared for war production, are proud to serve the UNITED NATIONS until the achievement of ultimate victory.
